DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1,6,7,16-22,24,29,30,34,35, and 39, drawn to a tax meter method of using a tax jurisdiction log, classified in class 705, subclass 19.
- II. Claims 40-48, drawn to a method of using a tax meter with a secure coprocessor, classified in class 705, subclass 204.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as method of tracking frequent flyer miles whereby the points accrued are tracked as taxes would otherwise be. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number (703) 305-0731.
